Good day!

DEQ just submitted our draft source control decision for the Brazil site to EPA. We asked EPA for a 30-day turnaround on their review. A copy of the draft decision is attached. If you have review comments, DEQ also requests that you provide them within the next 30-days.

The Brazil Motors and Controls, Inc. site, (ECSI # 1026) is located 4315 NW St. Helens Road in Portland. DEQ's proposed source control decision is that Brazil has identified and controlled upland sources of contamination from current and past operations such that contaminant transport pathways at the site do not pose a significant current or future threat to the Willamette River.

Please let me know if you have any questions. Also, feel free to contact the project manager Alex Liverman directly, 503 229-5080. *Please note that the memo presents the justification for both a Portland Harbor source control decision as well as a No Further Action determination. We are requesting EPA and the TCT to focus on the elements of the source control decision and not the NFA decision which relates to upland risk.*
